# Owner User Manual

How to run your building in Predio, step by step. As the Account Owner you have full access. You do most work in the web console at [app.predioapp.com](https://app.predioapp.com); the mobile app shows the same building on the go. Predio Help (the ✦ on any screen) does these same tasks with you interactively and links you straight to the screen — this is the written reference.

[predioapp.com](https://predioapp.com) · bilingual EN / ES

**Run any building. From one app.**

[predioapp.com](https://predioapp.com)

---

## 1. Sign in

---

1. Go to **app.predioapp.com** and enter your **email** and **password**, then click **Sign in**.
  2. Top bar: the **building switcher** (left — pick which building you're viewing), the **global search**, the **EN / ES** language pill, **Predio Help (♦)**, notifications, and your **avatar** (Settings + Sign out live under the avatar).
  3. Module tabs run across the top: **Home · Directory · Financials · Reports · Maintenance · Guard & Security · Community · Settings**.
- 

## 2. Set up a building

---

1. **Add the building:** Directory → **Properties** → **Add property**. Enter the country, city and name.
  2. **Add units:** open the property → **Units** → **Add unit** (or bulk-import). Give each a label (101, 2-A, etc.).
  3. **Add residents:** Directory → **Residents & owners** → **Add resident**. Enter first + last name, email, phone, the unit, and whether they're an **owner** or **tenant**. Predio emails them an invite to set their own password.
  4. **(Optional) Parking, vendors:** Directory → **Parking** to add spots and assign them to units; **Vendors** to add payees.
- 

## 3. Bill residents

---

- **One charge:** Financials → **Invoices & charges** → **New charge** → pick the unit, the type (dues, parking, late fee...), the amount, and the due date → **Save**. If auto-send is on, it emails the resident.
  - **The whole month:** Financials → **Generate monthly** → review → **Generate**. This creates each unit's recurring invoices at once.
  - To send an existing invoice by email: open it → **Send by email**.
- 

## 4. Approve a reported payment

---

1. When a resident reports a payment it lands in Financials → **Pagos reportados (Reported payments)**.
2. Open the item — you see the proof photo, the amount, and which invoices it covers (oldest first).

3. Click **Approve & issue receipt** (or **Reject** with a reason, which messages the resident). Approving applies the money to the unit's ledger and issues the receipt. - Optional: choose which **bank account** the deposit went into so that account's balance goes up too.

## 5. See the money

- **Home** shows the building's KPIs: **Collected** · **Outstanding** · **Overdue** · **Collection rate**, plus who's overdue.
- **Financials** → **Overview** is the full picture, with a **Desde–Hasta (from–to)** month range.
- Every figure is **per unit** — one unit's overpayment never hides another's debt.

## 6. Run and export a report

1. Reports → pick one: **Statement of account / good-standing certificate**, **A/R aging (cartera)**, **Delinquency (morosidad)**, or **Collections**.
2. Set the range/unit as needed.
3. Click **PDF** to export a branded copy.

## 7. Maintenance

1. Residents report issues; they appear on Maintenance → **Board**.
2. Open a ticket → **Assign** it to a maintenance worker (or a vendor).
3. The worker resolves it with a photo; you can follow every ticket.

## 8. Community

- **Notices:** Community → **Notices** → **New notice**. Write it (you can format text, add photos, attach documents), mark it **Critical** if residents must confirm they saw it, then **Publish**. Critical notices show an **Avisos críticos** roll-up of who confirmed.
- **Messages:** Community → **Messages** — the team inbox; reply to residents, assign threads.
- **Amenities / Access:** Community → **Amenities** to add bookable spaces; **Access** for the visitor/pass log.

## 9. Your team and roles

---

1. Settings → **Team & roles**.
  2. **Add a person** (or invite a login for an existing staff record). Pick their **role** (Owner/Admin/Office/Maintenance/Guard) or a **custom role**.
  3. Toggle "**Ve finanzas**" (**finance access**) per person, and **Archive access**.
  4. **Create a custom role**: start from the Office base, then add/remove capabilities from the menu.
  5. **Manager flags**: turn a maintenance or guard person into a **manager** (sees the whole board / all gate activity) with the per-person switch.
- 

## 10. Settings you own

---

Under **Settings** (avatar menu): Account, Team & roles, **Features** (turn modules on/off per building), Branding (logo), Language, Invoicing, **Manuals**, Payment settings, Lease reminders, **Predio AI**, and per-building **Tax & invoicing**, **Notifications/quiet hours**, **Time zone**, **Late fees**, **Online payments**, **Deposits**. Only Owner/Admin reach Settings.

---

## 11. Getting help

---

Open **Predio Help** (↗) on any screen and ask in plain language. It explains any screen and can look up a unit or resident in your scope — it teaches and answers, it never moves money.
